

Description

A two-day program presented by the North Carolina State Laboratory of Public Health in Raleigh, NC in conjunction with Eagleson Institute. The workshop will enhance knowledge and develop skills to allow for the safe, secure, and appropriate handling of potentially infectious materials at all levels in the clinical laboratory. Topics include risk assessment, personal protective equipment, waste management, sample handling, and emergency procedures.

Who Should Attend?

The workshop is open to clinical laboratories and local health departments within North Carolina. PACE continuing education credits will be awarded to participants.

North Carolina State Laboratory of Public Health employees should register by contacting Marion Alston.
